High Security Business Checks

Results shown below may vary.

High-Security Background Colors

Copiers and scanners cannot duplicate these green, burgundy, blue, yellow, or purple background colors.

Foil Hologram

Cannot be reproduced by copiers or scanners.

Heat Sensitive Ink

Ink area fades when warmed. If copied, color will not fade or be absent entirely.

Anti-Copy Technology

Also known as V-Dot technology, this feature makes check very difficult to reproduce on the majority of today's copiers and scanners.

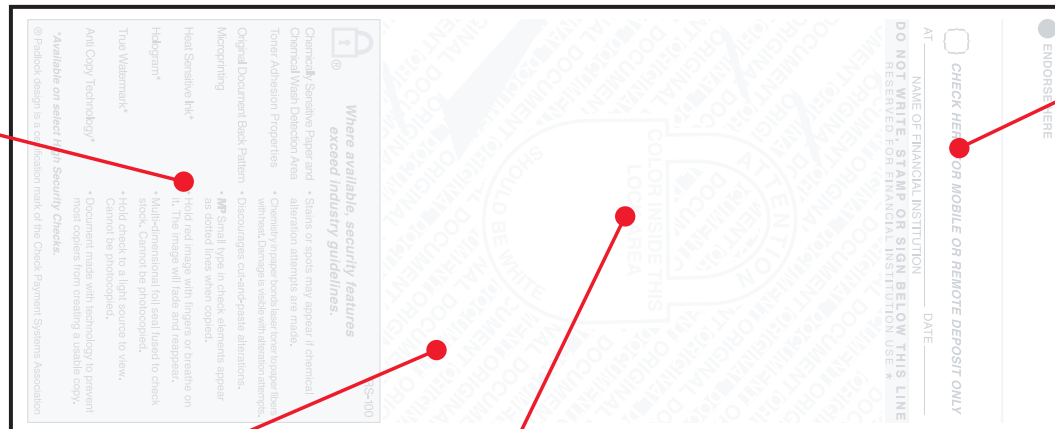

True Watermark

Watermark pressed into paper can be seen by holding the check up to a light source but cannot be reproduced by copiers or scanners.

Warning Box

Back of check lists security features that may be in place and how to detect fraud.

Mobile Deposit Reminder

Track and date mobile deposits to prevent depositing checks twice.

Check Back Pattern

Deters cut-and-paste alteration attempts.

Chemical Wash Detection Area

Chemical alteration attempts result in stains or discoloration in padlock area.
