

deluxe[®] PAYMENT EXCHANGE

There's finally a digital solution that makes payments quick, easy and smarter.

Deluxe Payment Exchange (DPX) brings you all the benefits of paper checks with the ease of an online system.

With payments from DPX, you'll never have to write out or print paper checks, buy check stock, stuff envelopes, waste money on postage, or run to the post office ever again. It's a 100% digital payment solution that integrates seamlessly with your current process. Even better? It's free to sign up!

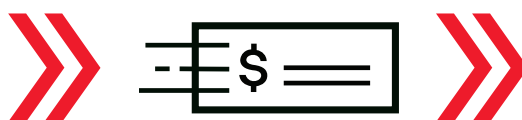

How does it work? **In a click!**

1

deluxe[®]
PAYMENT EXCHANGE

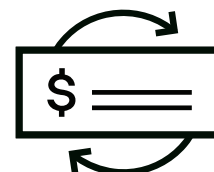

Create an account and link bank account to the platform.

2

Enter payment details, remittance and attachments directly into the platform, upload a file or use the QuickBooks connection. Select eCheck to email a payment or Print+Mail for DPX to send out a printed check on your behalf.

3

If using an eCheck, the recipient is notified of payment via email, views remittance data and chooses their deposit method — either electronically or printed. If Print+Mail, the recipient receives their check payment with remittance data in the mail.

It's that easy.

More than 5 million recipients have been paid through DPX.

My favorite thing is the quickness and how soon the vendors received payment. The simplicity behind it; of not having to worry about checks getting lost in the mail or anything like that. There's nothing that I don't like.

DPX offers Big Benefits for Businesses:

Reduced time and costs — Create and send digital payments in a fraction of the time — and at less than half the cost — of sending paper checks manually. A DPX client reported that they ran 6,000 checks in just 9 minutes! The traditional method typically takes 7 minutes to complete just 10 checks.

Highly Secure — DPX reduces the opportunity for check fraud by mail by using a secure website for sending and receiving payments. Each payment includes a proprietary stamp on each eCheck that allows financial institutions to verify authenticity. Patented Cyber-crypto technology and EZShield[®] Premium Check Protection also protects against forged signatures and endorsements, as well as altered and counterfeit checks.

More flexibility — Deliver payments in just seconds anytime, from anywhere, without the need for printers or check stock. If you prefer to issue paper checks, use our Print + Mail service. Simply send your payments through the platform and we'll print and mail high-security checks for you.

Easy Integration — DPX integrates seamlessly into your current check-payment process, giving you various methods for initiating payments. Issue directly through the platform, import via CSV file, utilize the direct QuickBooks[®] integration or use an API for high volumes of payments.

Simultaneous Remittance Data — Each DPX payment can include detailed, freeform remittance information for transactions like an accounts payable payment, an EOP for a medical payment, pay stub for a payroll payment, even claim information for an insurance payment.

Multiple Deposit Options — Recipients can print or deposit checks using available bank deposit methods including mobile and branch; direct deposit or deposit to debit card or to PayPal.
